

Our approach

As first time claimants, the Team initially discussed an overview of the SME R&D Tax Relief Scheme, including the qualifying activities and expenditures, prior to undertaking a thorough review of Miles Macadam's operations; which identified a number of qualifying R&D projects, including; product, process and material innovations.

Through a series of financial and technical meetings, The Team produced a detailed R&D Report; documenting the R&D projects and how they qualified for R&D Tax Relief, together with an analysis and apportionment of the qualifying R&D expenditures, to assist with HMRC's processing of the submission.

MANUFACTURE AND INSTALLATION OF ENGINEERING PRODUCTS

About the claim

Miles Macadam has been operating since 1970, and have gained an enviable reputation as a market leader in the manufacture and installation of advanced Grouted Macadam systems. Their certified products, Hardicrete™, Hardipave™, Milepave™ and Hardicoat™ have been developed and specified for construction and engineering projects throughout the UK, which has enabled the expansion into delivering integrated civil engineering and construction services across both the public and private sectors.

Whilst acutely aware of R&D Tax Relief for a number of years prior, the Miles Macadam chose to work with the Capital Allowance Review Service due to our industry-leading approach and attention to detail, which minimises their time during the claim preparation, whilst maximising their R&D Tax Relief.

“

"I've worked with Capital Allowance Review Service for 3 years and have no hesitation in recommending their services. I was particularly impressed with their knowledge and how efficiently they gained an understanding of our business. They have a great team and made the whole process really simple."

Kit Ebben | Director
