

Case Study – Cold Ashby Golf Club

Scenario: The Cold Ashby Golf Club opened in 1974 although the original design was extended 12 years ago. It now offers 27 holes of quality golf with its three loops of nine (the Winwick, Ashby and Elkington nines) which work their way across impressive undulating terrain. The Cold Ashby clubhouse was rebuilt in the early nineties and now offers a wonderful wedding and meetings venue and also boasts a comfortable lounge bar with a unique gallery of Open Champions with pictures of every Open Champion since 1860.

“When our accountant suggested we make a Capital Allowance claim to recover previously paid tax and to offset future tax liabilities we thought this too good to be true, especially when it was suggested we use a company whose fee is based totally upon success. As there was no financial risk to ourselves we took this advice. How pleased we are that we did as the results were beyond belief. Substantial unclaimed capital allowances were identified by the physical survey of the course and buildings. There was little involvement required from ourselves as the majority of the required information was provided to Capital Allowances Review Service (the Capital Allowance Specialist) by our accountant. In addition to the very welcome refund from HMRC, we will enjoy additional valuable benefits for a number of years to come. We unreservedly recommend our friends and colleagues in the golfing fraternity and beyond to take advantage of their expertise and to seek their advice, remembering there is no risk as their fee is contingent upon success.”
