

# CASE STUDY

Research and Development Tax Credits

## Copper & Optic Terminations Ltd

### ABOUT COPPER & OPTIC

Copper and Optic Terminations Limited has been firmly established as one of the leading manufacturers of high-quality cable assemblies and fibre optic solutions since 1997. With capabilities ranging from PCB, Cable & Harness, Fibre Optic Assembly, ATE Testing and Project Co-Ordination, Copper and Optic are able to offer a first class service to their Clients.

In this case study, their projects were identified as being eligible for R&D Tax Relief. We identified research and development costs of £268,275, which totalled £335,344 when uplifted and secured the tax savings from the 2015 claim.

Phil Latham, Managing Director -

“I can tell you I’ve turned away scores of telesales calls offering the kinds of tax relief benefits for R&D relief over the years but on this occasion, it was clear that Capital Allowance Services knew what they were talking about. Only a couple of short meetings to explain what we do, how we do it and we left it all to them. I was astonished to receive the amount of relief we did and the best thing is we should be able to claim this or similar year on year. Someone pinch me please.”

R&D Claim  
Claimed £335,344

Refund of Tax
