Review completed for
2015, 2016 & 2017

R&D Claim Total
£3,072,717.00

Tax Credit Generated
£724,717.00

Robert Kennedy, Director says, "I'm really pleased that Capital Allowance Review Service was recommended to me for my R&D Tax Credit claims. The way they applied their expertise to my business was superb. The individuals working on my case were very impressive technically and their process didn't disrupt my daily activity.

The result they secured was staggering as over a three year period they generated around £720k tax benefit!. I would highly recommend anyone who is carrying out Research & Development to get in touch with these guys as they are a great firm to work with."

ABOUT STRATHENDRICK BIOGAS LIMITED

Our client's aim was to develop an on-farm anaerobic digestion process, that would utilise wastes from the farm, combined with higher quality feedstocks, in addition to undertaking experimental developments that would result in a viable large-scale process.

Based in Salfron, Scotland, the Company has designed, developed and implemented a bespoke and innovative anaerobic digestion process, capable of producing biogas by combining energy crop, farm waste and distillery co-products.

The Company continues to invest in research and development to maintain and enhance its reputation within the industry.

ABOUT THE CLAIM

We reviewed the companies expenditure over a three year period. We identified qualifying research and development costs generating a tax credit (cash) in excess of £720,000.00
